

FINKLE | ART & DESIGN
BY CHRISTINA FINK

Christina “Finkle” Fink is a contemporary german Painter and 3D Artist.

The foundation stone of her artist career was already laid in very early stages of her life. She always enjoyed using every opportunity to live her creativity. As a child she built three dimensional models made out of paper or drew a whole catalogue with 500 different kinds of comic sheep.

Her training as a multilingual secretary led her to a showlaser company in which she was able to introduce her creativity into the production of laser shows. The first laser animation show she created was awarded the second prize of its category by the ILDA Awards, also known as the Oscar of the laser industry. Three more Awards followed.

The fascination for spatial art motivated her to study Virtual Design. At the moment she is a full-time 3D Artist creating virtual environments and game assets.

In 2021 she finally found the time for painting again and enjoys the balance between digital and analogue art. Her observation skills give importance to the smallest details in her works, showing how much every single unit contributes to the big picture.
